Jan Bertus Molenkamp

It is too early to invest in biodiversity

Today's topics:

Why

invest in Biodiversity?

Awareness

How

to invest in Biodiversity?

Investability & Business case

How to

Measure

the Biodiversity Impact?

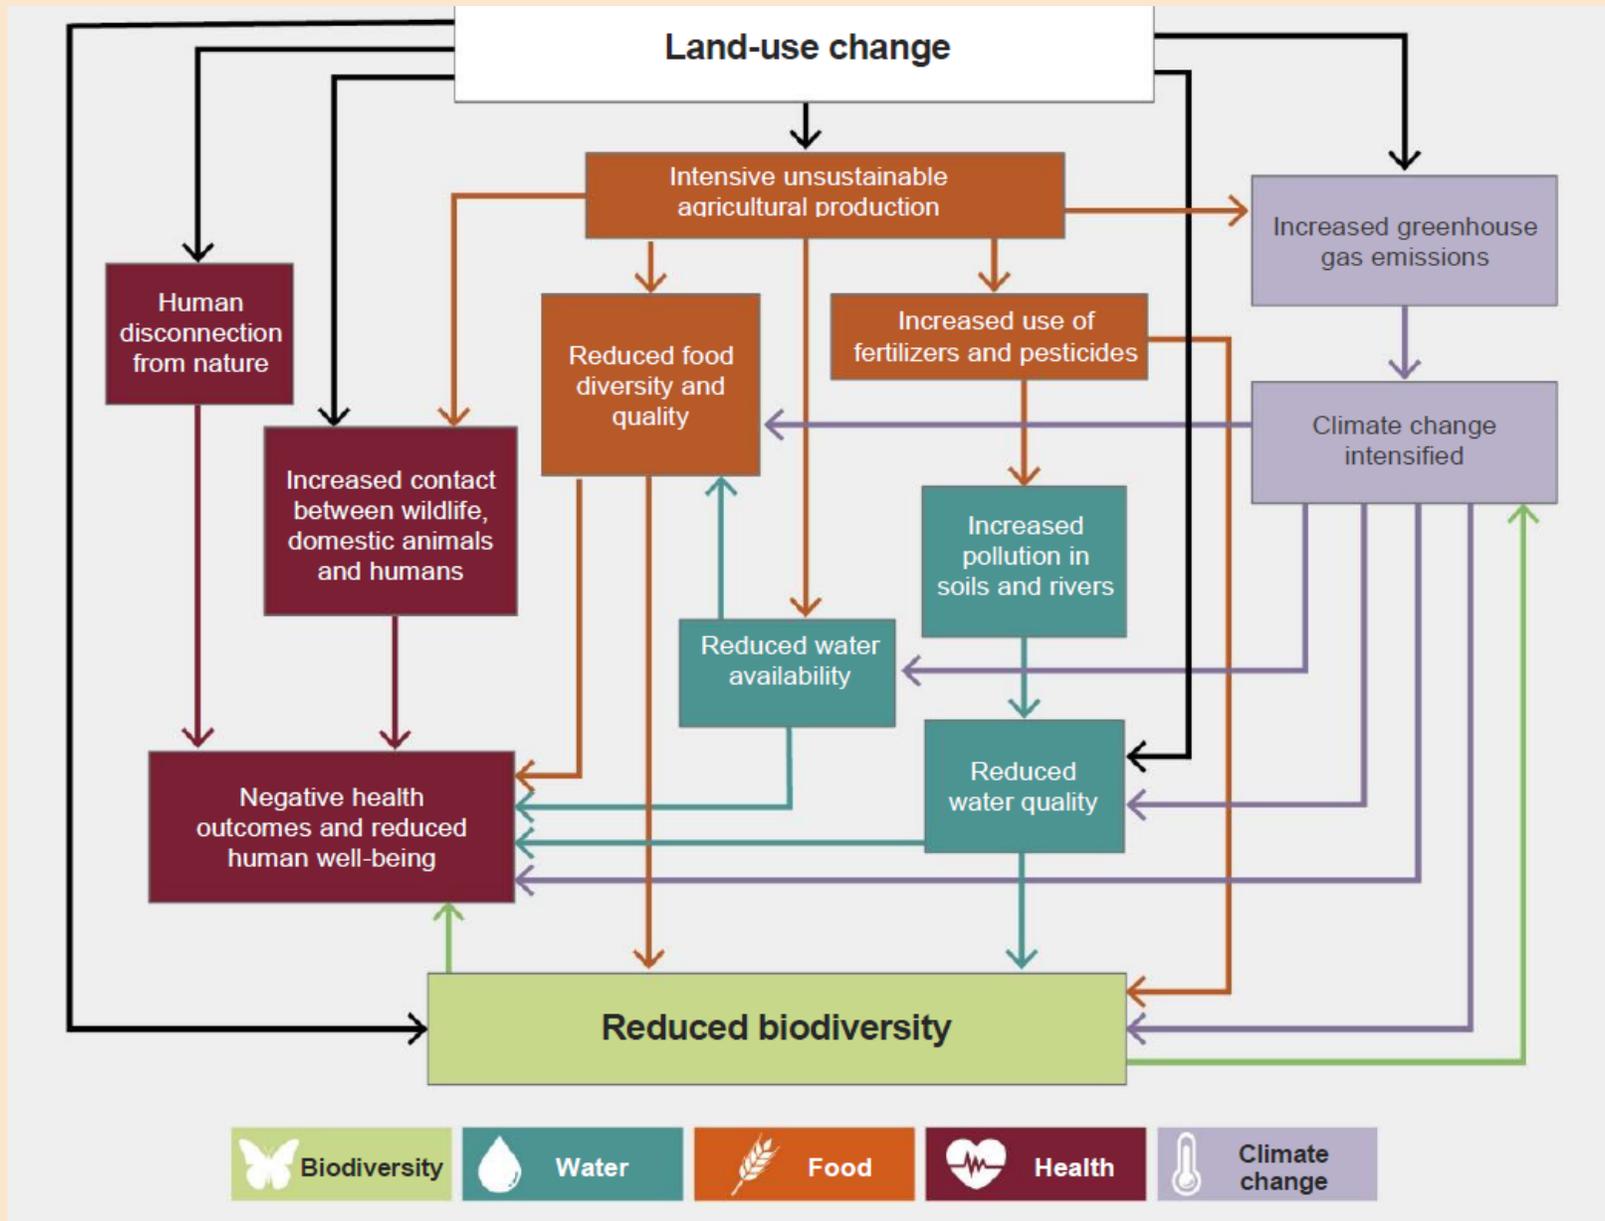

More than 50% of the global economy is dependent on nature

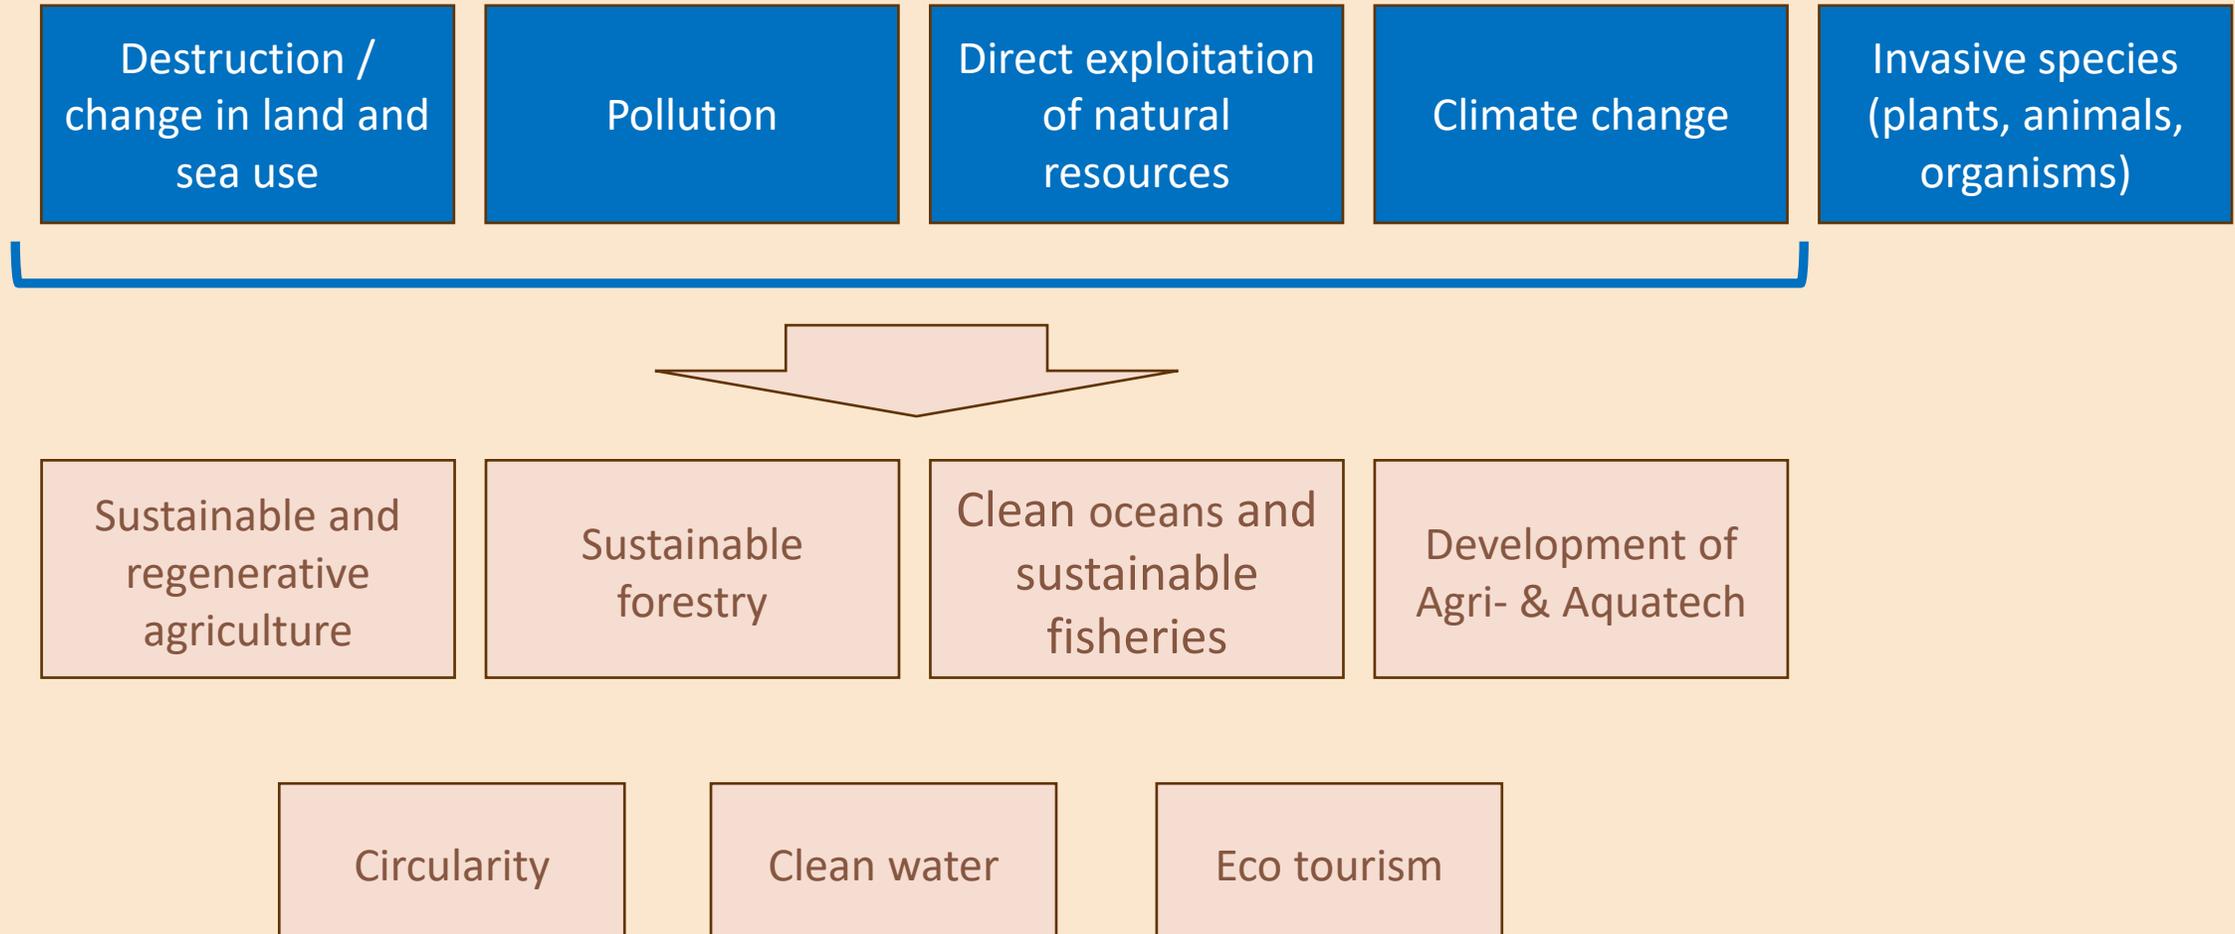

Dependency on nature (1 = highest)	Impact on Biodiversity (1 = highest)
<ol style="list-style-type: none">1. Agriculture and fisheries2. Clothing, accessories, luxury goods3. Brewery, distillers, beverages4. Food production5. Electrical utilities6. Forestry7. Construction8. Renewable energy9. Textile10. Water utility	<ol style="list-style-type: none">1. Marine, harbours & services2. Agriculture3. Airports and services4. Oil, gas exploration and production5. Mining6. Oil, gas storage and transport7. Distribution

Our worldwide challenges are completely interlinked

Investable themes targeted at causes of Biodiversity loss

Opportunities to invest in biodiversity are varied; most impact in private markets

- Equity
 - Private equity (venture, growth, buyout)
 - Public equity (large, mid, small)
- Real assets (farmland, infrastructure, forestry)
- Debt
 - Public debt (sustainable & impact & blue bonds)
 - Private debt (senior & subordinated)
- Structures
 - Funds
 - Direct participations / co-investments
 - Blended finance

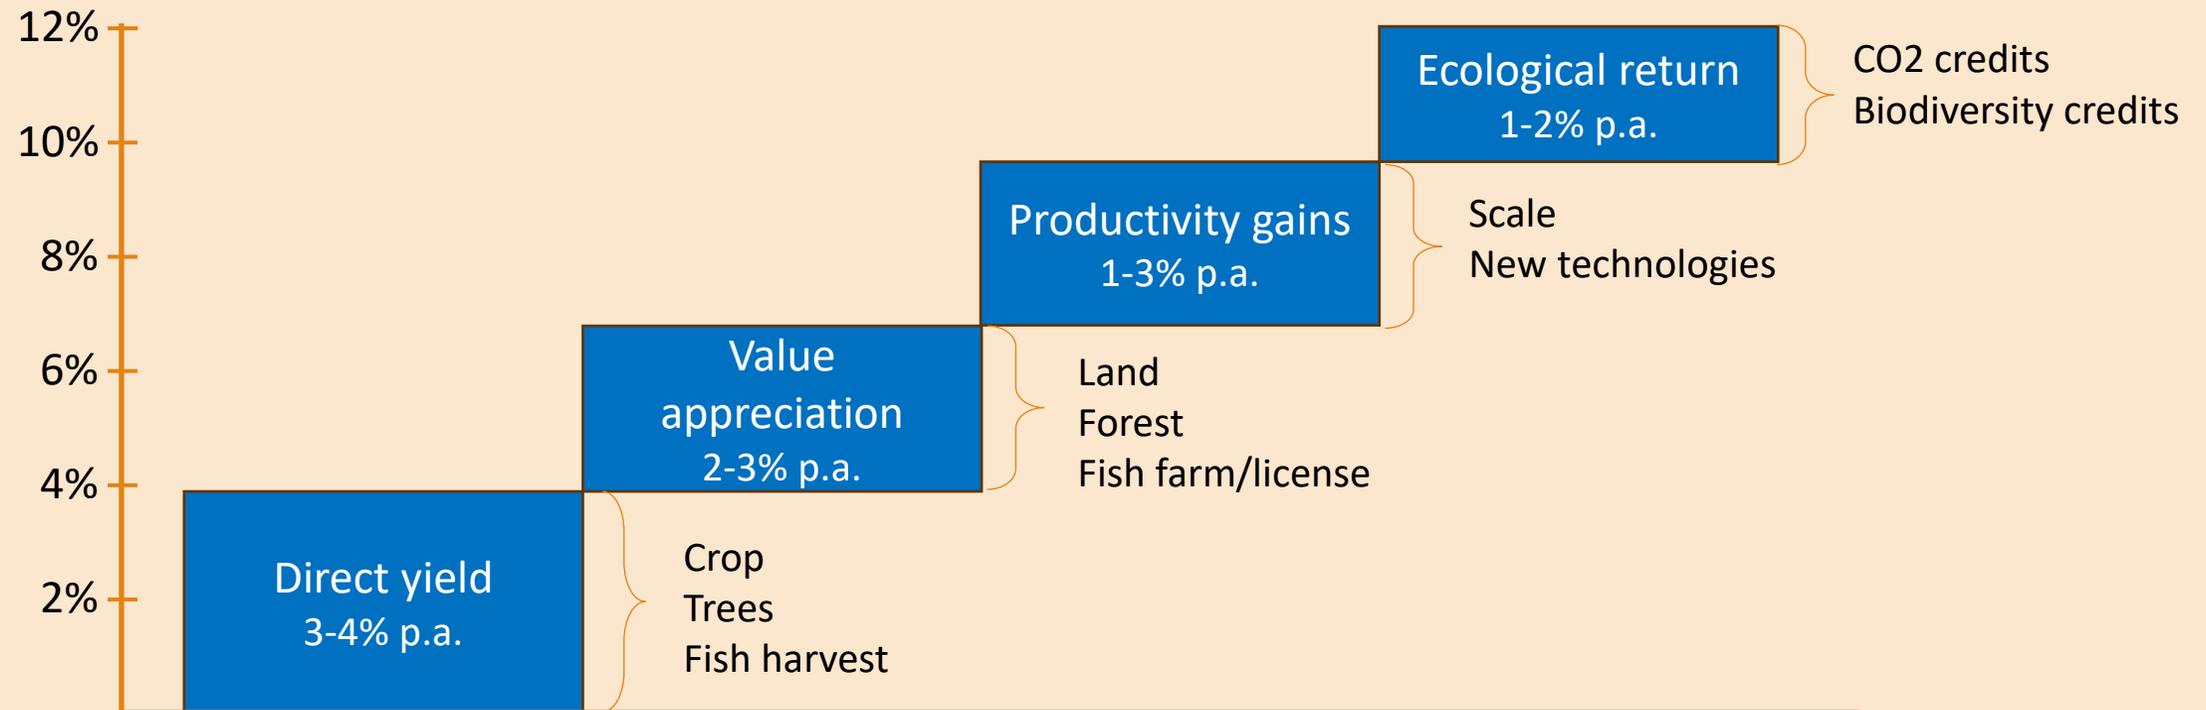

Equity
(as (co-)owner)

Debt
(as a lender)

Impact investing is still investing for financial return

Biodiversity investments are mainly real assets

Challenges

- New asset classes
- New investment managers
- First time & small funds
- Concentration risks
- Lack of liquidity
- Creative marketing
- Impact measurement

Look for investment partners in biodiversity, in order to avoid mistakes

Biodiversity measurement & monitoring

The numbers tell the tale...

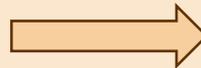

Energy transition

Social progress

Biodiversity

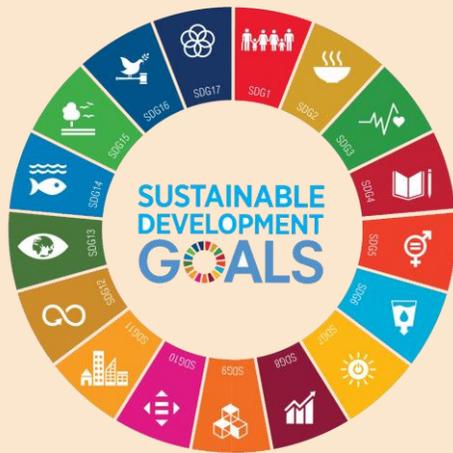

- Number or area of trees?
- Number of animals / species / organisms?
- Soil health / water quality / human toxicity?
- ...

Impact measurement is advancing ...but we are not yet there
